

PC-04 · MOISTURE & FILM FORMERS · PERSONAL CARE

HS-K90

PVP

INCI PVP	CAS 9003-39-8	EC —	FAMILY PC-04	SUPPLIED AS Powder
-------------	------------------	---------	-----------------	-----------------------

01 POSITIONING

The polymer the styling category was built on — in the K-value your line needs.

02 HOW IT WORKS

- 01

Film fixation

Dried films lock hair fibers at their set position — hold strength scales with K-value.
- 02

Humidity balance

Hygroscopic films stay flexible and combable instead of flaking.
- 03

Binding & dispersing

K30 binds tablets and disperses pigments; K90 builds stronger films.

03 APPLICATIONS

- Hair gels, sprays and mousses
- Styling creams
- Tablet binding (pharma/nutra grades)
- Pigment dispersion
- Peel-off masks

04 FORMULATION GUIDE

USE LEVEL	1–10%
PH & CONDITIONS	Stable pH 3–9
— Dissolve in water under moderate stirring; add ethanol systems slowly to avoid stringing.	
— Choose K-value by hold target: K30 light-medium, K90 strong.	

05 TYPICAL SPECIFICATION

Appearance	White free-flowing powder
K-value	per grade: 27–33 / 88–96
Residual monomer (NVP)	≤ 10 ppm
Water	≤ 5%

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Curl retention at 90% RH (class data)

PVP film systems

Film clarity

PVP class

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
