HS Kojic Acid

Kojic Acid

INCI	CAS	EC	FAMILY	SUPPLIED AS
Kojic Acid	501-30-4	207-922-4	PC-07	Crystalline powder, ≥99%

01 POSITIONING

The acids the actives aisle is built on — pharmacopoeia-grade purity, cosmetic-grade paperwork.

02 HOW IT WORKS

- 01

Keratolytic action

Acids loosen corneocyte cohesion, accelerating desquamation and smoothing texture.
- 02

Lipophilic pore access (BHA)

Salicylic acid penetrates sebum-filled pores, targeting blemish formation at the source.
- 03

Tyrosinase interference

Kojic and mandelic acids dampen melanin synthesis for measurable tone evening.

03 APPLICATIONS

- Exfoliating toners and serums
- Blemish and oily-skin lines
- Brightening and anti-spot treatments
- Peels (professional grades)
- Scalp exfoliation

04 FORMULATION GUIDE

USE LEVEL	0.5–2%
PH & CONDITIONS	Efficacy depends on free-acid pH; formulate 3–4 within regional limits

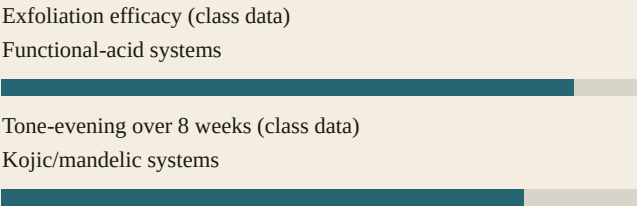

- Pre-dissolve salicylic acid in glycol or ethanol; buffer to target pH for the free-acid ratio.
- Add a soothing agent (panthenol, allantoin) to manage the exfoliation trade-off.

05 TYPICAL SPECIFICATION

Appearance	White crystalline powder
Assay	≥ 99%
Melting point	per molecule, per TDS
Heavy metals	≤ 10 ppm

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
