

PC-04 · MOISTURE & FILM FORMERS · PERSONAL CARE

HS-PG USP

Propylene Glycol

INCI	CAS	EC	FAMILY	SUPPLIED AS
Propylene Glycol	57-55-6	200-338-0	PC-04	Liquid, ≥99.5%

01 POSITIONING

Commodity molecule, non-commodity consistency —
USP paperwork included.

02 HOW IT WORKS

- 01

Hygroscopic hold

Hydroxyl groups bind water, keeping formulas and skin surfaces from drying out.
- 02

Coupling solvent

Bridges water and oil-soluble ingredients — the universal cosolvent for actives and fragrance.
- 03

Preservation support

Lowers water activity, easing the preservative load of the system.

03 APPLICATIONS

- Skin and hair care bases
- Fragrance and active premixes
- Wipes and cleansers
- Household products
- Industrial fluids (per grade)

04 FORMULATION GUIDE

USE LEVEL	2–15%
PH & CONDITIONS	Inert across formulation pH
— USP grades for personal care; premix actives in glycol before water-phase addition.	
— DPG reads less tacky than glycerin at equal humectancy — blend to tune after-feel.	

05 TYPICAL SPECIFICATION

Appearance	Clear colorless liquid
Assay	≥ 99.5%
Water	≤ 0.2%
Grade	USP / cosmetic

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Freeze protection (aqueous systems)
With 5–10% glycol
Fragrance coupling capacity
Glycol systems

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
