

PC-02 · SILICONES · PERSONAL CARE

HS 1401S

PEG-12 Dimethicone

INCI PEG-12 Dimethicone	CAS —	EC —	FAMILY PC-02	SUPPLIED AS Fluid, 100% active
----------------------------	----------	---------	-----------------	-----------------------------------

01 POSITIONING

Silicone conditioning for formulas that must stay crystal clear.

02 HOW IT WORKS

- 01 Amphiphilic silicone

The PEG side-chains solubilize the siloxane backbone in water and surfactant bases.
- 02 Clear-system conditioning

Adds slip and softness to transparent shampoos without clouding.
- 03 Foam-friendly

Unlike hydrophobic silicones, does not collapse lather.

03 APPLICATIONS

- Clear and baby shampoos
- Shower gels with skin-feel claims
- Wet wipes
- Textile softeners

04 FORMULATION GUIDE

USE LEVEL	0.5–3%
PH & CONDITIONS	Stable pH 3–10
— Water-phase addition at any process point; no emulsifier needed.	
— Combine with polyquaternium for a deposition boost.	

05 TYPICAL SPECIFICATION

Appearance	Clear to slightly hazy fluid
Active content	≥ 99%
Cloud point (1%)	per TDS

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Clarity in surfactant base
PEG-12 dimethicone

Wet comb improvement
+ 1–3% PEG-silicone

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
