HS BTMS 50

Behentrimonium Methosulfate (50% blend)

INCI	CAS	EC	FAMILY	SUPPLIED AS
Behentrimonium Methosulfate (50% blend)	—	—	PC-06	Pellets

01 POSITIONING

The quat the clean-beauty wave standardized on — vegetable chain, mild counterion, premium feel.

02 HOW IT WORKS

- 01

C22 chain lubrication

The extra-long behenyl chain lays a thicker, softer lubricant layer than C16/C18 quats.
- 02

Methosulfate mildness

The methosulfate counterion reads milder than chloride on scalp and eyes (class data).
- 03

Lamellar gel network

With its fatty alcohol, self-assembles the cream base of a conditioner — quat, structure and emulsifier in one.

03 APPLICATIONS

- Premium rinse-off conditioners
- Deep masks
- Leave-in creams
- Curly-hair and textured-hair lines
- Natural-positioned conditioners (vegetable origin)

04 FORMULATION GUIDE

USE LEVEL	1–6%
PH & CONDITIONS	Formulate pH 3.5–5.5

- Melt at 70–75 °C into the water phase under agitation; homogenize and cool slowly to build the gel network.
- 25% grade for lighter rinse-off; 50% for rich masks and leave-ins.

05 TYPICAL SPECIFICATION

Appearance	White to off-white pellets
Active quat	per grade: ~25% / ~50%
pH (5% dispersion)	3.5–5.5

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Softness panel score (class data)

BTMS base

Detangling on bleached hair

BTMS systems

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
