

HN-01 · SPORTS NUTRITION · HUMAN NUTRITION

HS-CarniLean

L-Carnitine

INCI	CAS	EC	FAMILY	SUPPLIED AS
L-Carnitine	541-15-1	—	HN-01	Crystalline powder, ≥99%

01 POSITIONING

The modular actives of sport — each one a claim the brand can build a product around.

02 HOW IT WORKS

- 01 Targeted functions

Each acid carries a distinct claim: arginine for NO/pump, carnitine for fat metabolism, beta-alanine for buffering.
- 02 Endurance buffering

Beta-alanine raises muscle carnosine, delaying acid-driven fatigue.
- 03 Recovery & hydration

Glutamine supports recovery; taurine supports cell hydration and focus.

03 APPLICATIONS

- Pre-workout formulas
- Endurance and pump products
- Recovery and immune support
- Energy drinks (taurine)
- Weight-management lines (carnitine)

04 FORMULATION GUIDE

USE LEVEL	Per amino acid: 1–6 g serving
PH & CONDITIONS	Water-soluble; stable across beverage pH
— Beta-alanine causes harmless tingling (paresthesia) — split-dose or use sustained-release if a concern.	
— Fermentation-derived grades support vegan and clean-label positioning.	

05 TYPICAL SPECIFICATION

Appearance	White crystalline powder
Assay	≥ 99%
Source	fermentation
Heavy metals	per USP/FCC

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Endurance uplift (beta-alanine, class data)

Beta-alanine loading

Formulation flexibility

Single amino acids

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
