HS-CDEA

Cocamide DEA

INCI Cocamide DEA	CAS 68603-42-9	EC 271-657-0	FAMILY PC-01	SUPPLIED AS Viscous liquid, ≥85% amide
----------------------	-------------------	-----------------	-----------------	---

01 POSITIONING

Decades in every formulary for one reason: the cheapest stable foam the industry knows.

02 HOW IT WORKS

- 01

Foam stabilization

Packs into the foam lamella, slowing drainage and collapse.
- 02

Viscosity building

Thickens anionic bases synergistically with salt.
- 03

Wetting support

Improves soil wetting in dishwash and household cleaners.

03 APPLICATIONS

- Dishwash liquids
- Economy shampoos and soaps
- Household and industrial cleaners
- Textile auxiliaries
- Metalworking fluids

04 FORMULATION GUIDE

USE LEVEL	1–4%
PH & CONDITIONS	Stable pH 6–10

- Melt-free liquid at ambient — dose directly into the surfactant phase.
- NF grade available where regional regulation restricts free DEA.

05 TYPICAL SPECIFICATION

Appearance	Amber viscous liquid
Amide content	≥ 85%
Free DEA	per grade (std / NF)
pH (1% solution)	9–11

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE – DIRECTIONAL

Foam half-life of anionic base
With 2–3% CDEA

Viscosity at equal salt
With CDEA

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
