HS-CreaPower

Creatine Monohydrate

INCI	CAS	EC	FAMILY	SUPPLIED AS
Creatine Monohydrate	6020-87-7	—	HN-01	Micronized powder, ≥99.9%

01 POSITIONING

The one sports active with nothing left to prove — sold on purity and consistency, not novelty.

02 HOW IT WORKS

- 01 Phosphocreatine reservoir
Saturates muscle phosphocreatine, the rapid ATP buffer for high-intensity effort.
- 02 Cell volumization
Draws water into muscle cells, a signal associated with hypertrophy.
- 03 Purity = tolerance
Low dicyandiamide and creatinine impurities improve digestive tolerance.

03 APPLICATIONS

- Pre- and post-workout powders
- Creatine monohydrate stick packs
- Strength and mass gainers
- Capsules and tablets
- Functional beverages

04 FORMULATION GUIDE

USE LEVEL	3–5 g daily serving
PH & CONDITIONS	Stable dry; hydrolyzes slowly in solution — formulate dry or ready-to-mix
— Micronized grade disperses faster and settles less in shakers.	
— Keep in dry formats or moisture-barrier packaging to protect against conversion to creatinine.	

05 TYPICAL SPECIFICATION

Appearance	White micronized powder
Creatine assay	≥ 99.9%
Creatinine	≤ 67 ppm
Mesh	200

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Strength gain over placebo (meta-analysis class data)
Creatine monohydrate

Evidence base (published trials)
Creatine monohydrate

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
