HS-CustomBlend

Custom vitamin premix (OEM)

INCI	CAS	EC	FAMILY	SUPPLIED AS
Custom vitamin premix (OEM)	per formulation	—	HN-02	Custom blended powder

01 POSITIONING

The build-to-spec end of the house — your formula, our blend, one drum with one number.

02 HOW IT WORKS

- 01

Formula-to-blend engineering

The brand's nutrient matrix is converted into one homogeneous premix with overages built in.
- 02

Homogeneity control

Validated blending ensures each serving carries the declared micro-dose.
- 03

Supply-chain compression

One SKU, one QC entry, one lead time — instead of managing a dozen actives.

03 APPLICATIONS

- Multivitamin brands (contract)
- Sports and clinical nutrition
- Food and beverage fortification programs
- Infant formula premixes
- Private-label supplement lines

04 FORMULATION GUIDE

USE LEVEL

Engineered to the customer's serving

PH & CONDITIONS

Formulated to the target matrix

- Share the target label claim, matrix and process — overages and carrier are engineered to them.
- Qualification sample plus stability protocol precede the first production lot.

05 TYPICAL SPECIFICATION

Appearance

Homogeneous blended powder

Composition

per customer specification

Homogeneity / assay

validated per COA

Documentation

spec sheet + COA + stability

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

Raw-material lines to manage
One custom premix

Dose homogeneity (validated)
Validated OEM premix

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
