

PC-05 · UV FILTERS · PERSONAL CARE

HS-DHHB

Diethylamino Hydroxybenzoyl Hexyl Benzoate

INCI	CAS	EC	FAMILY	SUPPLIED AS
Diethylamino Hydroxybenzoyl Hexyl Benzoate	302776-68-7	443-860-6	PC-05	Powder / crystals

01 POSITIONING

The UVA seal on the pack starts with the UVA molecule in the drum.

02 HOW IT WORKS

- 01 Long-wave chromophore
Peak absorbance in the 340–380 nm window where UVB filters are blind.
- 02 UVA-balance compliance
Raises the UVA-PF/SPF ratio to meet EU and Latin American labeling thresholds.
- 03 Photoaging defense
Long-wave coverage addresses the dermal damage behind wrinkles and spots.

03 APPLICATIONS

- PA+++ / UVA-seal sunscreens
- Anti-spot and melasma-adjacent lines
- Daily urban SPF
- Sun care for photosensitive skin

04 FORMULATION GUIDE

USE LEVEL	Per regional annexes
-----------	----------------------

PH & CONDITIONS	Respect regional ceilings; check solvent demand per filter
-----------------	--

- DHHB dissolves readily in cosmetic esters — ideal for elegant, light UVA systems.
- Pair with photostable UVB partners; verify the UVA-PF/SPF ratio at the target region's method.

05 TYPICAL SPECIFICATION

Appearance	Pale-yellow powder / crystals
------------	-------------------------------

Assay	≥ 98%
-------	-------

Peak absorbance	~354 nm
-----------------	---------

Regulatory listing	per region, per TDS
--------------------	---------------------

Typical parameters. The specification on the current TDS and the per-lot Certificate of Analysis govern.

06 PERFORMANCE — DIRECTIONAL

UVA-PF contribution per gram
Dedicated UVA class

Photostability (DHHB class)
DHHB

Values are representative of the ingredient class, based on published technical literature, and shown directionally for comparison. Final performance must be validated in the customer's formulation.
